Molasses Products, Processed Grain By-Products, Plant Protein Products, Urea, Soybean Oil, Magnesium Oxide, Hydrogenated Vegetable Fat, Defluorinated Phosphate, Grain Products, Calcium Chloride, Salt, Attapulgitic Clay, Calcium Carbonate, Calcium Sulfate, Zinc Sulfate, Vitamin A Supplement, Manganese Sulfate, Zinc Oxide, Vitamin D3 Supplement, Manganous Oxide, Sodium Selenite, Ferrous Sulfate, Potassium Iodide, Sodium Molybdate, Cobalt Carbonate.

FEEDING DIRECTIONS:

ACCURATION® Sheep & Goat Hi-Fat Block is scientifically formulated to be fed free choice to sheep and goats along with forage.

1. Consumption of ACCURATION® Sheep & Goat Hi-Fat Block should be approximately 0.5 to 1.0 pound per head per day for sheep and goats depending on quality and quantity of forage.
2. Provide one 200-pound block for each 25 to 40 head of sheep/goats.

3. Several weeks prior to, and during feeding of ACCURATION® Sheep & Goat Hi-Fat Block, provide a good quality mineral supplement that contains phosphorus.
4. Adequate forage should be provided at all times.
5. Prior to introducing the blocks, animals should be accustomed to high-forage diets.
6. Do not offer ACCURATION® Sheep & Goat Hi-Fat Block in fields where crops are grown that are known to contain high levels of urease enzyme such as soybeans or in conjunction with other NPN containing feeds.
7. Feed blocks near the area where animals loaf and/or a water source.
8. In large pastures, blocks should be available in more than one location.
9. If animals run out of blocks, observe them closely for three days to prevent over consumption after refeeding.
10. Provide an unlimited supply of clean fresh water.

IMPORTANT:

Consumption of ACCURATION® Sheep & Goat Hi-Fat Block will vary depending on quality of forage, quantity of forage, condition of sheep or goats, previous feeding programs, and block feeding location. Animals may need to adapt to the block before the correct consumption is reached. If consumption is low, examine forage quality and the block feeding location. If consumption is higher than desired the quantity/quality of forage may need to be increased, the blocks can be placed further away from the loafing or watering area, and/or reduce the number of blocks available to animals.

Available Options:

Product No.	Product Form	Size
3004804-634	Poured Block	200# Plastic Tub

Product Features:	Product Benefits:
Accuration® Technology	Designed for self-feeding utilizing Intake Modifying Technology® that results in controlled consumption of multiple meals per day to help ensure proper intake.
Hi-Protein Formula	Supports proper protein intake when forage quality is sub optimal.
Hi-Fat Content	Helps support body condition and reproduction.
Scientifically Formulated	Designed to be fed free-choice along with forage.
No Added Copper	Safe for sheep.
Year-round Usage	Helps maintain consistent body condition.
Poured Block	Weather-resistant product form.
200 lb. Size	Provides greater convenience for your operation.

IMPORTANT:

Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death. This product was made in a feed manufacturing facility that does not handle or store products containing animal proteins prohibited in ruminant feed. USE ONLY AS DIRECTED.
